SOFT SKILLS

- Team Leadership
- Motivation
- Innovative
- Coordination

About Me

I have a significant interest in learning about and keeping up with the most cutting-edge innovations in the field of information technology as a motivated and dedicated undergraduate. I have a strong desire to learn new things constantly, and I tackle every assignment with determination, maturity, and a feeling of accountability. My ultimate aim is to secure a software engineer internship where I can use my skills and diligent self-study to succeed. I'm devoted to working hard and remaining unwaveringly dedicated in order to make significant contributions to the field while obtaining useful experience in this position.

EDUCATION

- Blogging
- Travelling
- Hikking
- Surf the internet
- Indoor Games

EXTRACURRYCULAR ACTIVITIES

- Carom player
- Prefect - 2017 to 2019

Projects

2022 - Animal Clinic Care System

The project's aims to improve communication and streamline operations in pet care facilities, which is integrating pet lodging, grooming, adoption, and training services into one convenient solution. This platform automates various tasks such as scheduling appointments, collecting client and animal data, and facilitating transactions. It also serves as a marketplace for buyers, sellers, and veterinarians, providing information on available pets, pricing, pet care supplies, and appointment availability.
Technologies used:
Angular, Java Spring Boot, MySQL

2023(On going) - Customer Management System

As a salesforce project, we are developing Customer Management System, a comprehensive solution designed to revolutionize the way you manage customer relationships. Our system provides a centralized customer database that allows you to store and access all relevant customer information in one place. and we are building an automated email system for the customers.

Referees

Mohamed Firdhous PhD., CEng(IT),
Senior Lecturer,
Faculty of Information Technology,
University of Moratuwa,
Moratuwa 10400,
Sri Lanka.
